Ensuring a Smoother Journey for You

## About Toyota Genuine Engine Care

Toyota brings you only the best products and service so that your car can perform at its best abilities. Maintaining and maximising the life span of your internal car parts is our priority here with Toyota Genuine Engine Care.

Our Engine Care Products — Engine Room Cleaner and Engine Room Coating — are extensively tested and approved by Toyota. We ensure that everything we use on your car is safe and good for your car. With Toyota Genuine Engine Care Service, your engine room compartment will look as good as new.\*

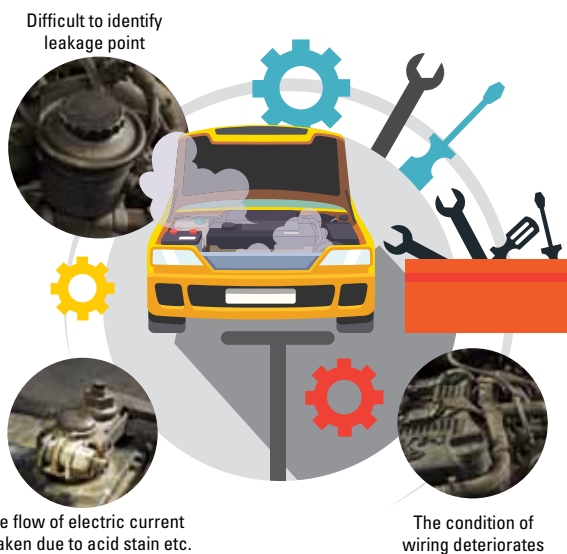

*\* Result may vary depending on existing engine room condition*

### Impact of Dirty Engine

A dirty engine compartment will potentially attract pests and bugs that will damage your components. When the engine compartment is caked with grease and dirt, it is also harder to identify the root of the problem in the event of a car breakdown. A dirty engine compartment cuts short your components' lifespan and durability, causing you more inconvenience.

Engine compartment cleaning is crucial for every car to work efficiently. Besides keeping the compartment clean and free from grease, stains and dust, it also allows you to detect any problem with your engine with ease.

## The Products

### Engine Room Cleaner

The Engine Room Cleaner is designed to effectively and safely dissolve grease, stains and remove dust in the engine compartment. The Cleaner cleans your engine compartment efficiently, even in the difficult-to-reach areas.

### Engine Room Coat

The Engine Room Coat is designed to use after the cleaning of the engine room compartment. The Coating keeps the components clean and maintains the durability of the components. It gives the engine compartment that deep satin black, brand-new look.

## Why choose Toyota Engine Care?

Independent workshop (No covering of sensitive area)

Toyota Service Centre (Protective cover on sensitive areas)

### Safety First

Before we wash and clean your engine compartment, we make sure that the sensitive areas in the compartment are covered with protective covers to avoid direct contact with water. Direct contact with water on the sensitive areas can affect your car's engine performance and durability. Only at Toyota Service Centres, we always put safety as our top priority.

### Toyota-certified Products

All Toyota genuine engine care products used are tested and approved by Toyota, making it safe for use on your car. We use only genuine Toyota solutions that are compatible to your car, giving you the best experience with our quality products. Genuine products are more durable, hence saving you more money in the long run.

### Professional Washing Staff

You can be assured that your car is in good hands every time. All washing staff at Toyota undergo extensive training to ensure professional and effective service. Washing staff adhere to Quality Checks and stringent Standard Operating Procedures. The SOP and checks are carried out conscientiously because we are committed to ensuring a smoother journey for you.

## Benefits of Toyota Genuine Engine Care

### Clean Engine Room Compartment

With Toyota Genuine Engine Care, you will have cleaner engine components that allow an easier identification of problems during servicing. Under Toyota's care, your engine compartment will look as good as new.

### Longer Lifespan for Car Components

Because we only use the best engine care products for your components, you can expect your parts to last a lot longer. We give you a peace of mind, while saving you time and money.

### Safer Car, Safer You

Our washing standard operating procedure (SOP), in consideration of safety measures, ensures that our products and services are safe for you and your car. As our valued Toyota customer, we want to ensure you enjoy a smooth journey always.
